Backtrack 3 With Spoonwpa Iso

GOVERNMENT CERTIFICATES HELP The eee pc where my problem is, is 100% M\$ whcih, of course, its known for its reliability and compatability, however the problem was that it was originally running windows 98 SE and wanted to update the OS to windows 7. I managed to burn the dvd and boot from it. I have seen posts online to how to get spoonwpa to work with it, but all the posts are very old and didnt seem to be available on the internet anymore. Not that hard with the help from the forums. I managed to get spoonwpa to work and used the cdtool to make the image of the disc I burned. It had spoonwpa when the iso burned, however when i used spoonwpa to get the wpa on, it all worked great. I tried to apply it to the disc I booted from, but it simply did nothing, the disc where as if it had been installed, took up over 100mb of space and worked fine. However I really would like to know how it was originally installed, I

always burn my dvds in a very responsible way, and always keep a back up when I need to. I'd really appreciate the information. 08-06-2010, 02:40 AM.
